

BATTLEZONE[®]

98 REDUX

Beginner's Guide to Stars and Stripes Mission 1: Red Arrival

This mission will assume that you are aware of how to control your movement and give basic commands.

Building a Scavenger

Your first objective is to build a scavenger and then escort it to the bio-metal deposit. Select the Recycler and order it to build a scavenger.

While your scavenger is building (about 5 seconds), choose a tank from those on offer behind you. Simply run into a tank to take control.

Your scavenger should now have finished building. It will immediately start looking for scrap.

Defending your scavenger from attack

Follow the Scavenger in your tank closely while looking out for danger. Eliminate the threats and ensure the Scavenger is kept safe.

You will soon be warned about another scavenger that is currently under fire. A target reticle will appear on your screen directing you to the Scavenger that needs assistance.

Mission Complete

When the threat has been eliminated return to base to complete the mission.
